Mojumdar Para, Sylhet Sadar

EDUCATION

Bachelor of Science in
Computer Science &
Engineering

Metropolitan University, Bangladesh

Started: 2023 | Expected Graduation: 2027

CGPA : 3.99

SKILLS

- Programming: Python, C++, Java, PHP
- Machine Learning: Supervised learning, data preprocessing, feature engineering, model evaluation
- Data & Databases: Data analysis, MySQL
- Core CS: Data Structures & Algorithms, OOP, Numerical Methods
- Web: HTML, CSS
- Research: Analytical thinking, experimental analysis, basic academic writing
- Tools: Jupyter Notebook, Google Colab, Git, Kaggle

About Me

I am a Computer Science student with a strong interest in research, machine learning, and data-driven problem solving. I enjoy exploring theoretical concepts as well as applying them through projects and experimentation. My academic goal is to pursue higher studies, including a PhD, and contribute to computer science research and academia while working on impactful and intelligent systems.

EXPERIENCE & ACADEMIC ACTIVITIES

Machine Learning Project – Lung Cancer Prediction

Python & Data Science Aug 2024 – Dec 2024

- Preprocessed real-world medical datasets and engineered relevant features
- Applied supervised ML models and evaluated performance using accuracy and recall
- Gained research-oriented experience in data analysis and ML methodology

Supervised Machine Learning: Regression and Classification

Coursera

- Completed structured coursework covering regression and classification techniques
- Gained practical exposure to supervised learning concepts and model evaluation

Assistant – Centre of Strategy and Policy Innovation (CSPI)

Metropolitan University 2024 – 2025

- Assisted in administrative and academic support activities
- Gained experience in teamwork, documentation, and organizational coordination
- Developed professional communication and responsibility in an academic environment
